Anna has a dog.

"His name is Buck. I gave him that name," said Anna.

"How old is he?" asked John.

"He will be 2 years old tomorrow. That is 14 years in dog years."

"How do you know?" asked John.

"Each birthday Buck is 7 years older in dog years. On his first birthday, he was 7 dog years old. Now he is 14 dog years old."

"How old will Buck be next year?" asks John.

"Well MY dog is much older than yours," interrupted Sally. She is always interrupting!

"That's nice," replies Anna. "How old is he?"

"Not going to tell you," laughs Sally. "Okay, I will tell you in dog years. He's 28 years old."

Anna wants to know how many real years that is. Help her!

Name: _____

Anna still has a baby pool in her garage. No one has used it in ages, so she decided to invite all her friends over for a pool party. All her friends and their dogs, of course. She texted Sarah, "Can you come over? It's Duke's birthday. He wants a pool party."

Sarah quickly walked her dog over to Anna's house. "Down, Max!" ordered Sarah to her pet beagle.

David also came with his pet dog, Lucy. She quickly ran after Max, and they both splashed in the pool.

"Aw. They are best friends," said Sarah. "How old is she?"

"I forget," said David. "But I know we got her the same year Anna got hers."

"Yeah," interrupted Anna. "Duke and Lucy are younger than Max. Not by much though! And Lucy is just a little bit older than Duke."

Which dog is the youngest?

Which dog is the oldest?
