Learning Reflexive Pronouns and Verbs

When pronouns refer back to the topic of a sentence and end in -self (or -selves), they are called reflexive pronouns. Action words are verbs. Circle all reflexive pronouns. Underline verbs.

Example:

scratch bite oneself thyself

himself think skip herself

toss yourself ourselves clip

bounce walk myself itself

Swirling Wind

By Cindy Grigg

You might hear about me on a weather report. I am a fierce storm. I am a column of swirling wind. The first sign of me coming is usually a dark, cloudy sky. Some people say the sky looks green or yellow before I swoosh in. My winds can be very dangerous. I can pick up cars and rip off parts of houses.

You are most likely to find me in the spring and summer. There is a strip through the middle of the United States where I am most often found. It is known as an "alley" that stretches from Texas to Iowa. The geography is just right in this area for me to form when cool, dry air masses and warm, moist air masses run into each other. Almost nowhere on Earth is safe from me, though.

I can last for only a few minutes and stretch for less than one mile. I can last for an hour or more. In that length of time, I can leave a path of destruction that is one hundred miles long or even longer! Nearly one hundred people die each year because of me. I cause a billion dollars of damage to homes, crops, and buildings each year.

Since I am so dangerous, weather reports warn people to let them know I am coming. I look like a cloud that is shaped like a funnel. When I first touch the ground, I may look bright white. But after my strong winds begin sucking up dirt, trees, and other stuff, I become darker and easier to see. People often say I make a noise like a freight train as I swoop over their homes. I hope you will never see me, but if you do, take cover!

Swirling Wind

Questions

1. What object is this story about?

_____

_____

_____ 2. Where is the object most often found?
