Amy heard everything, and she had to have her say. She always does! "Well, I'm 8 and I'm going to be having my three-fourths birthday this month," she said.

Ava and Jenna looked dumbfounded. They never heard of a one-fourth birthday, not to mention three-fourths. Maybe they should take the 12 months in a year and group that into four groups so that it will make sense.

Any idea how old Amy will be this month in years and months?

Your thinking is what's important!

Show it! How? By using a pencil and writing down how you figured out this super difficult math problem.

Mike and Andy were bored. It was too cold to play outside, and their parents had banned electronic play for the rest of the day. All the boys wanted to do was lie on the couch, play video games, and watch basketball on TV. Unfortunately, that wasn't an option. Mike was starting to get on Andy's very last nerve. This was the sixth straight day they'd been stuck inside together because of the snow. Mike wadded up a piece of paper and threw it at his brother. The paper ball hit Andy right in the middle of the chest. At first, Andy was angry. Then the wad of paper gave him a great idea! He and his brother could play basketball inside! They grabbed two plastic cups to use as baskets and kept the wad of paper to use as their ball. Each basket was worth 2 points. By the time the game was over, Andy had 56 points, and Mike had 42 points. How many baskets did they make altogether?
