What I Did on Vacation - Art Project - Grades 1-4

Students can use these shape pages to draw or write about what they did during their vacation. Three different shapes are included.

Materials Needed:

Printouts, crayons, colored pencils or markers, scissors, stapler

Preparation:

Have students discuss (possibly in small groups) some of the things they did during school break. Decide if students will make a single picture, or if they will make a booklet which could show several different things they did or tell a story.

Directions:

- 1) Have students choose a shape for their project. If they will be making a booklet, have them write down what they plan for each page.
- 2) Students can color and possibly write (depending on their grade) on each page inside the shape.
- 3) Cut out the shape along the outer lines. Students should write their names on the back of the page. If they are making a booklet, the pages should be stapled together along an edge.

Finished projects can be hung around the classroom or on a bulletin board, or passed around the class.

DAY 1

A praying mantis has only **one** ear, located in the middle of its body.

Arkansas is the **one** state in the U.S. where diamonds can be found.

In Roman numerals, **one** is written as **I**.

ODAY 2

Two things are called a pair. People have a pair of feet, so shoes are sold in pairs. You also have a pair of hands and a pair of ears. What else comes in pairs?

ODAY 3

A triangle is a shape with **three sides.
A shamrock is a plant with **three** leaves,
and so is poison ivy, which makes many
people itch.**

DAY 1

Maps show **four** main directions – north, east, south, and west.

A square has **four** equal sides and **four** corners.

TODAY'S

A star is a shape with **five** points. Apples have **five** seed pockets. When you cut an apple in half from side to side, you can see a star.

In Roman numerals, **V** means **five**.

Today 6

All insects have **six** legs.

A hexagon is a shape with **six** sides.

A guitar has **six** strings.

7 DAYS

There are **seven** days in a week.
There are **seven** rainbow colors.

When the numbers on the two opposite sides of dice are added, the sum is always **seven**!

1. Monday
2. Tuesday
3. Wednesday
4. Thursday
5. Friday
6. Saturday
7. Sunday

DOAY 8

Light from the sun takes **eight** seconds to reach the Earth.

There are **eight** major planets orbiting our sun.
Spiders have **eight** legs.

BIRTHDAY

There are **nine** players on a baseball team.
K-9 means dog because it sounds like the word
canine.

You share your birthday with about **nine** million
other people.

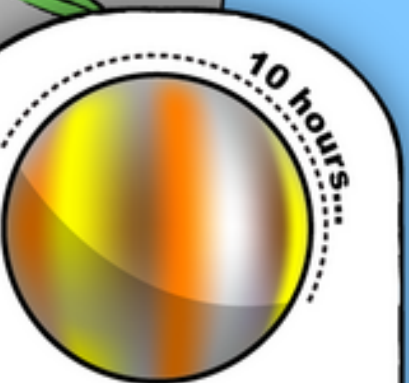

DAY 10

A day on Jupiter is only about **ten** hours long.

In Roman numerals, the letter X means **ten**. It is made of two Vs put together.

Your esophagus, the tube connecting your mouth and stomach, is about **ten** inches long.

Star Student Supplies

The included materials will provide you the opportunity to make each child in your class the "Star Student" for a week! Here's how:

- ★Photo Frame: Display a picture of the little star inside!
- ★Bulletin Board: Use the rainbow heading at the top center. Spell out the student's name on large (duplicated) blank stars and tack below. Use the smaller star pieces for attractive accents.
- ★Mobile: Write the featured child's name on the biggest star. Fill in the requested information on the others. Punch holes where indicated and use string to hang them in a pleasing arrangement. (You can also use the biggest star to be a necklace).
- ★Surprise Notes: Write "special" jobs (line leader) or privileges (choose the snack) onto these and present them to the "Star" each day!
- ★Summary Letter: Complete this form to alert parents and ask for any needed items or info. from home. ©edHelper.com
