Name: _____

Robot was given a math problem to solve.

Gavin bought his mother a big bouquet of tulips to thank her for all the things she did every day. He gave them to her on No Housework Day. The tulips cost \$14.48. If he gave the clerk \$20, how much change did he get back?

Robot wrote this program in Python to solve it.

```
tulips_cost = 14.48
```

```
gavin_gave = 20
```

```
change = gavin_gave - tulips_cost
```

```
print(change)
```

Robot's program will print the answer to the math problem.

What will the program print out? Fill in the blanks.

_____ . _____

Hints and Questions

After Robot's program is done, the variable `tulips_cost` will have a value in it. What value does it have?

In the program, "`tulips_cost`" is called a variable.

It is used to store a value. Name two other variables used in the program.

Name: _____

Robot wrote this program to solve a math problem.

```
# Assign value to the cost of the card
```

```
card_cost = 63
```

```
# amount given by Sarah
```

```
sarabs_money = 75
```

```
# Calculate the change
```

```
sarabs_change = sarabs_money - card_cost
```

```
print(f'Sarah gets {sarabs_change} cents change.')
```

What will the program print out? Fill in the blanks.

Sarah gets ____ cents change.

Wait! Robot forgot to write down the math problem.

Can you write your own word problem to explain Robot's computer code?

Name: _____

"That song again?" asked Anna.

"Yeah. I can't get it out of my head," replied Jack. "Luckily I got this new Out of Your Head app. It repeats songs. You first setup how long you want it to repeat. When you start the app it doesn't first play the song, it waits that long. I have it set to repeat this song every 8 minutes. It's a quick song, it lasts only 2 minutes."

"Cool!" replied Anna. Anna installed the app on her phone. She set up the app for 15 minutes. Her song is a little longer. When she starts the app it will first wait 15 minutes before it will play her song, which lasts 3 minutes. The app will then wait another 15 minutes and then play the song again. It will keep doing that until you stop the app.

"Hey, Anna. Let's start the app at the same time. My song will begin in 8 minutes. Your song will begin in 15 minutes. I wonder when both of our songs will be playing music at the same time."

How long until both songs are playing at the same time?

Name: _____

Emily rode her bike to Holly's house. Leaving her driveway, she turned right and rode about 1.8 kilometers where she turned right. Holly's house was the seventh house on the left side of the road. It's getting late, and Emily needs to go home, but she has brain freeze. Write directions on how she should ride her bike home from Holly's house.

If this pattern continues, color how these squares would look:

Rose wrote a program. It inputs a letter. Then it inputs a number. If you input Z and 7, the program will count backwards from Z and tell you what the seventh letter is. It will print S. Show what the program should print for these inputs.

a. S and 10

b. X and 6

c. L and 3

David has 12 one-dollar bills, 4 five-dollar bills, 13 ten-dollar bills, and 6 twenty-dollar bills. He wants to pay a bill of \$217 at the grocery store and get no change. Which bills should he give the cashier?

Name: _____

Fill in the missing numbers.

$$5.618 \times \underline{\hspace{2cm}} = 561.8$$

$$0.05618 \times \underline{\hspace{2cm}} = 561.8$$

$$56.18 \times \underline{\hspace{2cm}} = 561.8$$

What is $\frac{2}{7}$ of 154? Show your work.

Name: _____

$$7 \text{ pearls} = \frac{2}{8} \text{ of a heart}$$

$$\underline{\hspace{2cm}} \text{ pearls} = \frac{2}{4} \text{ of a heart}$$

Make a coordinate grid where you can plot x and y values from 0 to 12. Remember x goes to the right and y goes up. Plot these points: (1, 1), (1, 6), (5, 6), and (5, 1). What is the perimeter of the rectangle you drew?
