Find a helper.

He/she helped by checking my work.

Name: _____

"Rocky is 44 years old," said Jenna to her friend.

"She is? But your brother said your dog was younger than that. And I just asked him a few minutes ago. Weird."

"Hey!" said Alex snooping by the door. "That's because Jenna doesn't use the simple formula to multiply a dog's age by 7."

"I may not use simple, but I use what's more accurate. A dog's first year of life is about 15 human years. A dog's second year equals about 9 human years. Every year after that is about 5 human years. That's why Rocky is 44 years old."

What's Rocky's real age?

How old would Alex say Rocky is?

edHelper**Name:** _____

Jill is reading a book about the history of cars.

"That book's huge," says Jack. "You'll never finish it!"

"I will," replied Jill.

"She will all right," said her BFF Jen. "But she's a weird reader. She read 1 page the first day, 2 pages the next day, 3 pages the next, 5 pages the next, 8 pages the next, and she is supposed to read 12 pages today."

"Yeah!" replied Jill. "It makes reading fun. I stop each day based on this pattern. It doesn't matter if I'm in a really good part."

"Are you kidding?" asks Jack. "How many pages will you read tomorrow?"

Show your work.

Name: _____

Julie and her three best friends all went out to dinner at Charlie's Cookery. Julie's mom drove them and sat at a different table. The girls had a great time and had great food. They laughed about their day, planned a sleepover party for the next weekend, and talked about their favorite TV shows. They shared chips and salsa, each got their own hamburger, and then split a dessert. The chips and salsa cost \$4.00. Each burger was \$10.00. The chocolate molten cake they devoured for dessert was \$6.00. When the bill came, the girls split it equally. How much did each girl have to pay?

edHelper**Name:** _____

It was a beautiful Saturday. Joe and his friend Mike were bored and broke. They wanted to do something outside, but they also wanted to make some money. They decided to have a lemonade stand. They gathered up materials and set up an awesome stand. They were outside for three hours before closing their shop for the day. They sold 10 cups of lemonade the first hour, 15 cups the second hour, and 5 cups the third hour. They charged \$0.25 for each cup. How much money did the boys make?

edHelper**Name:** _____

Jonah's parents own Smitty's Fish Market off the Hilo Pier. They sell fresh fish to all the local restaurants in town. Their supply varies each day based on what they've caught that morning. On Friday, his parents caught and sold 130 pounds of tuna and 65 pounds of Ono. On Saturday they caught and sold twice as much tuna but only half as much Ono. How many pounds of fish did they sell in all on Friday and Saturday?
