Fill in the missing numbers. How? The sum of the four surrounding numbers is in the center of each square. Exactly one of the four numbers has to be one of these numbers: 8 thousands, 5 thousands, 2 hundreds, 3 thousands, or 3 thousands.

The other three numbers have to all be DIFFERENT and must be from these: 1 one, 9 ones, 6 tens, 4 tens, or 7 tens.

Robert's favorite player is number 45 - 15. "What's your favorite player?" Robert asks Jack. "My favorite player's jersey has a number that is 5 more than your favorite player," Jack replies.

What number is on the jersey of Robert and Jack's favorite players?

Jacob is bored, so he decides to start coloring the outside sidewalk. Would you believe every 15 minutes he goes through 13 pieces of chalk. That's a lot of chalk! After 2 hours his arms are so tired he quits. How much chalk did Jacob use?

Anna collects squishies. Before she started getting serious about collecting, she only had 6 of them. But now she has 21 squishies. She ordered 9 really big squishies online. They should be delivered next week on her birthday. And guess what? Next week on her birthday, she invited 5 friends over for a slumber party. In the invitation she said, "No gifts. Just give me 3 squishies."

On the day after her birthday, how many squishies will Anna have?
