John and Billy went to Sally's Good Food Restaurant. They each ordered a regular hamburger. John got a side mac and cheese with juice. Billy wanted fries and the Cool Dude meal along with water. The food was so good, and they had such a great time that they didn't realize the waiter already left a bill.

"I'll pay," said John. He left exactly enough money for the food along with a 20% tip for the waiter.

How much money did he leave?

Jenny has been trying to get a summer job. Her brother said he could use help with cutting people's grass. He offered to pay her 30% (He'd keep 70%.) of lawns they cut.

"How much is that?" asked Jenny.

"Well, I cut about 3 or 4 lawns in a day. With your help maybe we could do 6, and I charge \$20 per lawn."

She also went into town and put in an application to work at Charlie's Ice Cream Shop. The shop pays \$6.50 an hour.

Jenny is not sure which job to take. Offer her some advice on what she should do. Think what you would do before giving advice.

Figure out the difference in pay between the two jobs. Would you ONLY consider pay to decide?
