Approximately how many fewer books has Dr. Seuss written than Agatha Christie, expressed as a fraction? An exact answer is not needed.

Theodor Geisel, better known as Dr. Seuss, wrote at least 43 books. He has sold an estimated 500 million copies of his books. Agatha Christie, who wrote mystery novels, has written 85 books that have sold approximately 4 billion copies.

For example: Pam wrote 80 books this year. Jacob only wrote 9 books. Jacob wrote about $\frac{9}{80}$ as many books. That's about one-tenth or $\frac{1}{10}$.

Let's assume that Agatha Christie's books average 200 pages each and that Dr. Seuss's books average 30 pages each. How many more pages did Agatha Christie write than Dr. Seuss?

Grace's family couldn't decide where to go for spring break. Grace wanted to go to Orlando, Florida. Her brother Max wanted to visit Atlantis in the Bahamas. Hunter, her other brother, for some reason, wanted to go to Hawaii.

The family decided to go where they go every year, which is to visit their grandparents in Canada. Grace loves visiting her grandparents. And she likes that she feels rich in Canada because whenever she brings United States coins, for some reason, she gets more in Canadian coins.

"Don't be silly," said Max to his sister. "Remember a few years ago the Canadian dollar was worth more? We LOST money in Canada!"

This year Grace brought coins with her. She had a total of \$1.80 in United States coins, consisting of a total of 13 coins. She didn't bother bringing pennies as Canada doesn't have a penny. Canada has six types of coins: 5¢, 10¢, 25¢, 50¢, \$1, and \$2. When she went to Canada, she exchanged her U.S. coins for Canadian.

"Will I get more or less Canadian money?" she asked the exchange person.

"We will give you \$1.10 in Canadian for each \$1 in U.S. money you give us."

What coins from the United States did Grace start with?
