Fill in the missing numbers. How? The sum of the four surrounding numbers is in the center of each square.

Exactly one of the four numbers has to be one of these numbers: 17, 29, or 26.

The other three numbers have to all be DIFFERENT and must be from these: 7.8, 0.6, 2.6, 6.2, 3.8, 4.2, or 8.4.

Name: _____

The first English dictionary, prepared in 1604 by Robert Cawdrey, defined 3,000 English words. In 1720, Nathan Bailey published the first English dictionary that tried to include most English words instead of just the hard ones. His dictionary contained about 60,000 words. How many more words did Bailey's dictionary contain than Cawdrey's dictionary?

Jacob was in the Navy. One day the wind caught his hat. It blew away from the ship, landed in the water, and washed up on Marko Island, one hundred seventy-one miles from the ship. Connor was a fisherman. One day the wind blew off his hat. It landed in the water and washed up on Marko Island, twenty-one miles from Connor's boat. How much further had Jacob's hat traveled than Connor's hat had traveled to get to the same island?

How many total legs are on 80 dogs.

Is 39 a composite or a prime number?

What is the sum of 10 and 736?

Jason is making a collection of jokes for Humor Month. He writes the jokes on cards and puts the cards in a scrapbook. He can put 10 cards on each page. He has 123 cards ready to put on pages. How many pages does he need?

Alex and his two brothers went to the circus. Tickets cost \$8 for ages 12 and up, \$7.25 for ages 6-11, and \$3.75 for all ages under 6. If the ages of the three brothers were 15, 11, and 6, what was the cost of the three tickets?

Hunter made two quarts of chocolate ice cream. Connor made three quarts of chocolate chip ice cream. Hannah made four quarts of fudge swirl ice cream. How much ice cream did they make in all? (Express your answer in gallons and quarts.)

Name: _____

Mrs. Clark, the fourth grade teacher, asked her students to estimate how many tortilla chips were in the bag. The student whose estimate was the closest would win the whole bag of chips! Nathan won the contest with an estimate of 99 chips. When the chips were counted, there were 119 chips in the bag. How many more chips were in the bag than Nathan estimated?

The workers in the Morningside Elementary School cafeteria told the students that it takes three hundred forty-seven pounds of ground beef to make hamburgers for all the students, but only one hundred sixty-one pounds of ground beef to make spaghetti for the same number of students. How many more pounds of ground beef does it take to make hamburgers than it takes to make spaghetti?

Write the greatest possible 5-digit number using only 2 different numbers.

$$\underline{\hspace{1cm}} \div 12 = 3$$

double 21 =

Sarah is showing her class how to do the Chicken Dance today. She even bought a beak to wear while she does the dance! The beak cost \$1.63. She gave the clerk \$5. How much change did she get?

Adam had \$112.45 in his savings account. His neighbor gave him \$6.75 for his birthday. He put it in his account. How much is in his account now?

There was a big sign in front of the park. It was about buying a car. It was very ugly. You couldn't even see the park entrance! The sign was 21 feet long and 12 feet high. What was the perimeter of the sign?

Name: _____

Robert went to the zoo. He wanted to see the penguins. There were 5 different kinds of penguins. There were 7 of each kind of penguins. How many penguins were there in all?

Kevin bought pearl earrings for his bride. The earrings cost \$140.80. Kevin had saved \$250 for his bride's gift. How much did he have left after he paid for the earrings?

Six students made a display for National Eye Safety Day. They set it up in the lobby. Everyone could see it there. The students spent \$54 on supplies for the display. Each student spent the same amount. How much did each student spend?

What number is halfway between 0 and 20?

$$4 \times 9 + 5 - 9$$

David earns \$17 an hour. He worked 6 hours. How much did he make?

Max had 4 cups of milk. He used all of the milk to make 2 chocolate milkshakes. How many milkshakes could he make with 8 cups of milk?

Ava made 42 cookies and put them in a cookie jar. There are 22 cookies left. Write an equation to express the change in the number of cookies in the jar.

Hunter had eighteen safety pins. He gave his sister four. Write an expression. Find the value.

Double the number 10 three times.

You have a playdate in 60 minutes. How many hours is that?

How many minutes are there from 8:15 p.m. until 8:45 p.m.?

edHelper**Name:** _____

It was a beautiful Saturday during spring break. Joe and his friend Mike were bored silly. They wanted to do something outside, but they also wanted to make some money so they could go to the game room. They decided to have a lemonade stand. They convinced Joe's mom to loan them the money for the supplies on the condition that they repaid her from their earnings. Mrs. Cummings spent \$3.00 on cups, lemons, and sugar. The boys made all the lemonade and set up a stand. They were outside for three hours before closing for the day. They sold 10 cups of lemonade the first hour, 15 cups the second hour, and 5 cups the third hour. They charged \$0.25 for each cup. After paying Mrs. Cummings back for the supplies, how much money did the boys make?

Name: _____

Emma is a bookworm.

"Yes," Emma says while reading. "I am an intellectual, an academic, a savant, and a scholar. I also read the same number of pages each day. It is essential that I read no less or no more."

"Hah! You don't even know what those words mean," says David.

"What she means," starts Hannah, while sitting across from them at the table, "is that she likes to read at her chair, on the swings, while playing soccer, and even in her sleep!"

"I don't read in my sleep!" insists Emma. "But I can't say that I haven't tried. Anyway, when I woke up I started reading this book. It will take me precisely a week. That's seven days if you care to know."

David has no clue how many pages per day Emma reads. He takes a quick look at the end of the book while Emma isn't looking. It has 252 pages.

How many pages will Emma read today?

"Wow," said Sprinkles. "Look at all that gold at the end of rainbow."

Sprinkles decided to take half the gold. Then he snuck 14 more pieces into his pocket.

"Hey, Fortune. Check this out!" yelled Sprinkles.

"Wow," said Fortune. "I think I'll just take half. I don't want to seem greedy."

Finally, Patty showed up. She took 11 pieces of gold and left.

Greenie was so happy when he saw the gold. But there were only 10 pieces of gold left.

"Gee," said Greenie. "I wonder how much gold was here before my friends took some."

Show your work.

Figure out how much gold was at the end of the rainbow before Sprinkles showed up!

Name: _____

$$18 \div \underline{\quad} = 9$$

How many total legs are on 60 chickens.

Is 21 a composite or a prime number?

24, 28, 32, _____, 40,
44, 48
