Jack the Rabbit loves spring break. His family is going to Wonder World. Wonder World is the most wonderful place on Earth. Animals come to Wonder World from all over the world. It is their dream come true! This year they introduced a new ride, Bouncing Balloon. This twirling, super fast balloon ride is the scariest ride ever. The good news is the line isn't very long, and Jack the Rabbit wants to go. The bad news is that for each animal that rides it takes 12 minutes. Only one animal can ride at a time.

Jack is not yet in the line, although he does see his friend in line. Still, he will need to get to the back of the line. Jack the Rabbit checks his phone. He has an app that will tell him how long the wait time is for each ride. What is the current wait time for Bouncing Balloon?

Show your work.

Name: _____

Can you draw lines to cover every number or shape in the picture?

You can only move left, right, up, or down. And definitely no starting or stopping in a blank spot!

The first one is already done for you. Good luck.

Draw exactly 8 lines.

Start on 1.

Do not pick up your pencil.

Draw exactly 5 lines.

A year on Mars lasts 687 days. Robot Pete lives on Mars. He is exactly 5 Mars years old. That means he was born 3,435 days ago, assuming a robot was born, which makes no sense. But who cares!

Robot Pete's older brother Jack was born 452 days before Pete. How many days old is Jack? Don't forget, to be older, Pete should be MORE days old than Jack! If your answer is less than 3,435 then think again.

Mrs. Miller needs to buy 38 cupcakes. At the mall, two stores sell cupcakes for the same price. Both stores have very tasty cupcakes. She has a coupon for the first store, Cupcakes are Good. The coupon is \$2 off every 3 cupcakes you buy. Would you believe she also has a coupon for the second store, Buy Here? Her coupon for Buy Here says \$1 off for every 5 cupcakes you buy, So BUY HERE. Hmmm. Which store is the better buy?

Name: _____

Bill brought 81 cookies to share with everyone in his class. That sounds like a lot, but they are mini cookies. Each cookie is only 1 inch in diameter!

They are oatmeal cookies, his favorite. Would you believe everyone in his class likes oatmeal cookies?

"I don't," interrupted Sally.

Okay, everyone likes then except for Sally. She doesn't like anything sweet. Bill wants everyone to get the same number of cookies. There are 14 kids in his class, including himself.

"Did you forget anyone else?" Miss Smith laughed. She is a cookie monster, so Bill wants to include her, too.

Quick! Everyone is hungry. How many cookies will everyone get? Don't forget to skip Sally!

Follow up: How many cookies are left and could not be shared evenly?

Show your work.

The students in Mr. Hall's class are making little bags of candy to give to the preschool students in the Little Steps program. They are putting three pieces of candy in each bag. They have sixteen bags to fill. How many pieces of candy do they need to fill the bags?

There are eleven boys in Mr. Garcia's class. Each boy brought four rocks to class. There are fourteen girls in Mr. Garcia's class. Each girl brought three rocks. Mr. Garcia put all the rocks on the table for the students to see. How many rocks were on the table?

Guess what you have to do on the Name that Number app? You guessed it! You name the correct number. For 50 gold stars, here is the clue. The number rounded to the nearest 10 is 180. The ones digit is 3. Quick! If you can write the answer in 30 seconds you get 15 bonus gold stars!

Emily collects squishies. Before she started getting serious about collecting, she only had 6 of them. But now she has 36 squishies. She ordered 8 really big squishies online. They should be delivered next week on her birthday. And guess what? Next week on her birthday, she invited 6 friends over for a slumber party. In the invitation she said, "No gifts. Just give me 2 squishies."

On the day after her birthday, how many squishies will Emily have?

Maya sold a lot of cookies. She sold so many cookies that she was the top seller in her troop.

"How many did she sell?" asked Jake.

"Let me see," said Maya. "I sold 88 boxes of Samoas, 92 boxes of Thin Mints, and 124 boxes of Trefoils. Want to go play in the backyard?"

"No time to play," interrupted her mom. "We need to go to Emily's house to pick up the boxes."

"Hi, Emily," Maya said when they got there. "Can we have a sleepover, Mom?"

"Did you forget why we came here?"

"Oh, yeah. Emily, I need to get my boxes of cookies."

Emily went to get her boxes of Samoas, Thin Mints, and Trefoils. All the cookies come in cases of 12. Emily's dad already prepared the Samoas. "Here you go," said Emily's dad. "Here are 7 cases of Samoas and 4 additional boxes for a total of 88 boxes. Let me just double check. Yup, 7 cases multiplied by 12 is 84. Then add 4 for a total of 88 boxes. Wow, you sold a lot! You must be tired. I'm tired, too! You go get the rest of your cases and boxes."

What should Maya take to complete her Thin Mints and Trefoils orders?

Please show how you found your answer.
