"I am the Great Michael Mathematician," said Michael. "I can do math in my head."

"Are you working on mental math in school? Not to sound too fancy to the great mathematician, but this doesn't sound like news to me," replied Sally giggling.

"Make fun, but let me show my great powers. I have 2 lucky numbers. Yes, 2. I can add these two numbers in my head, using your so-called mental math powers. The sum is 21. Why are you giving me that look? I can do more. If I subtract the smaller number from the larger number, the difference is 5."

"Wow," was all Sally could muster up in a disdainful reply. "I think I know your two numbers using my own mental math powers."

What should Sally reply with?

Show your thinking.
