Approximately how many fewer books has Dr. Seuss written than Agatha Christie, expressed as a fraction? An exact answer is not needed.

Theodor Geisel, better known as Dr. Seuss, wrote at least 43 books. He has sold an estimated 500 million copies of his books. Agatha Christie, who wrote mystery novels, has written 85 books that have sold approximately 4 billion copies.

For example: Pam wrote 80 books this year. Jacob only wrote 9 books. Jacob wrote about $\frac{9}{80}$ as many books. That's about one-tenth or $\frac{1}{10}$.

Let's assume that Agatha Christie's books average 200 pages each and that Dr. Seuss's books average 30 pages each. How many more pages did Agatha Christie write than Dr. Seuss?
