Can you draw lines to cover every number or shape in the picture?
You can only move left, right, up, or down. And definitely no starting or stopping in a blank spot! The first one is already done for you. Good luck.

Draw exactly 5 lines.
Start on 1.
Do not pick up your pencil.

Draw exactly 5 lines.
Start on the square.
Do not pick up your pencil.

Draw exactly 4 lines.
Start on the square.
Do not pick up your pencil.

Oh, no. This picture is all mixed up. Try to redraw the picture using the letter and number as a guide.

Name:

Write the number.
Write the number
5

Wre $\bigcirc-$

Name: $\qquad$

Pick up all of the robots from the game board. Start on the $\mathbf{B}$ circle. Do not pick up your pencil. Draw a line going left, right, up, or down. Every line must end on a robot or the E circle. No stopping on an empty box. Try to collect all the robots and end your last line on the $\mathbf{E}$ circle. You can go through a robot more than once.

Didn't get them all? That's ok. This was hard. I missed only $\qquad$ robot/robots.
